

Deltek Announces the Release of Vision 5

Deltek is pleased to announce the release of Vision 5, which includes important enhancements in Resource Planning, Visualization, Reporting, Purchasing, CRM, Time and Expense, Accounting, Billing, Payroll, Document Management, and Info Centers. Among many other features, Vision 5 provides:

- Unprecedented new Resource Planning capabilities that will help you to more effectively manage project budgets, schedules, and resource utilization. It includes an all new user interface, improved performance, a new Resource Utilization view that lets you quickly understand and optimize employee utilization across all projects, and many other exciting enhancements.
- New on-screen controls for Visualization that make it easy to modify the Visualization view on the fly so you identify underlying trends and patterns that require immediate attention.
- Inventory Management for professional services firms that also sell product.
- A new grid view for Info Centers that saves time and puts important, personalized Info Center data at your fingertips.
- New features for clients doing business in the UK and other International locations.
- Support for Microsoft Windows Vista and Office 2007.

Version 5 is available to customers that are currently enrolled in the Deltek Support and Maintenance program. Please note that in order to upgrade to Vision 5, you must have previously installed either Version 4.0 or 4.1.

To view the Release Notes for Vision 5 and to complete the download, you have two options:

- **Option 1:** From the Windows Start menu on any Deltek Vision server, go to the Deltek Vision folder, click on the "Check for Updates" shortcut, and select the Deltek Vision 5 Download.
- **Option 2:** Go to <http://support.deltek.com/Distribution/DeltekVision.aspx>, login, scroll to the Documentation section to view the Release Notes, or the Download section to complete the download.
